

Exception

- 1) Write a function to compute $5/0$ and use try/except to catch the exceptions?
- 2) Write an example program for EOFError, ImportError?
- 3) Write an example program for try/finally exception?
- 4) Write a program that takes a number=26 and user provide a input as some integer.
Now write a program that check whether the number guessed is correct or not if the input number is small then return an exception and input is larger then return an exception?
